OFFICE OF COLLECTION AND DISSEMINATION

29 July 1971

MEMORANDUM FOR THE CHIEF, ICAPS

SUBJECT: Liaison with State Department.

REFERENCES: a. Draft memorandum for the DCI, from Chief, ICAPS,  
subject as above.

b. Draft memorandum for Mr. Eddy from DCI, subject: Liaison.

1. This Office strongly concurs in the intent of the above references which are designed to provide more effective CIG liaison with the State Department. It is felt, however, that their scope is possibly too limited and that the negotiations with Mr. Eddy should be broadened to include not only multiplying authorized liaison contacts within the Department but also to designate a central control office, possibly the Executive Secretariat (E/S), which would process all requests from the State Department to CIG and vice versa, receive all material disseminated by CIG to the State Department, serve as the control contact for modifying the classification of intelligence material of mutual interest and fulfill other similar functions.

2. a. In the event you consider that the referenced memoranda and the negotiations with Mr. Eddy may appropriately be broadened in scope, as discussed in par. 1 above, it is believed that the subject of the memoranda should be changed to: "Control Points within the State Department for the Processing of CIG Intelligence Matters".

b. The body of the memoranda should be changed accordingly in order that procedures relative to the processing of intelligence matters of mutual interest to the State Department and CIG, as well as the granting of authority to establish additional liaison control points in various areas of the State Department, would be included. A suggested summary paragraph to be placed toward the end of reference b follows:

"I would further appreciate the initiation of action by your Office which would lead to the formal designation of a central control office within the Department of State, such as the Executive Secretariat, which would process all requests for intelligence information from State Department to CIG and vice versa, receive all intelligence disseminated by CIG to the State Department, serve as the control contact for modifying the classification of intelligence material of mutual interest, and perform other similar functions."

3. However, if the more limited memoranda cited above are felt to constitute the best initial approach to Mr. Eddy, the following recommendations for changes are then submitted:
